

Web Summit 2015

DataLabor.Com was selected for the ALPHA class to present revolutionary software Hyperspace ERP and HyperSpace Management Platform

It is with great pleasure and pride that DataLabor.Com has learnt to be selected as an Alpha at Web Summit 2015.

DataLabor.Com is an artisan company specialized in software development that will present two advanced solutions:

Hyperspace ERP

Hyperspace ERP is a revolutionary business management application for small and medium size companies looking for a modern, open and customizable software.

Hyperspace ERP is not only an ERP, but your customized management! Thanks to a friendly environment author, you can configure and adapt it quickly to your needs: you can easily add new table or new field and you can quickly create new views able to adapt to various contexts of use or workgroups.

The strengths of Hyperspace ERP are Advanced User Interface (Personal Dashboard, Custom Views, Magic Button, Active Fields, Input Wizard), Dynamic Chunking, User Group Manager, Client Integration, Media Manager, Macro, Print Merge, Communication Center, Level Security, Self Management.

Hyperspace ERP, based on an innovative and exclusive technology called HyperSpace Management Platform, is a web application that can be used both in intranet and extranet and mobile environment.

HyperSpace Management Platform

HyperSpace Management Platform starting from a dream, it has evolved and has reached its 4.0 step of evolution. It has been used to create management applications for lawyers, vendors, business holding, funeral service, Parma Ham producers.
